Bridge Replacement
on State Rd. 152
over CSX/Indiana

Hazardous Materials Investigation

Replacement of Blackford County Bridge 96

One palustrine, forested, broad-leaved deciduous, temporarily flooded wetland (Cowardin) was identified on the northwest corner of the structure. The wetland delineation revealed that only minor impacts to this jurisdictional wetland will occur as a result of the bridge replacement project.

A wetland exists on both sides of US 20 just east of the I-69 interchange. A Wetland Delineation was completed for this roadway improvement project. This INDOT project should avoid impacts to this wetland.

INDOT Des No.: 9803670/0300942

INDOT Interchange work at I-69 and Us 20; US 20 Bridge Replacement over I-69
