General Manager  
Lebanon Utilities  
P.O. Box 479  
Lebanon, IN 46052-0479  
Telephone: 765-482-5100

### Summary:

The project included approximately 4,300 feet of 16 inch diameter ductile iron water main along the reconstructed Sam Ralston Road project. In addition, a shallow sanitary sewer needed to be relocated in order to enable the reconstruction of Sam Ralston Road. The overall project included the road reconstruction, bridge replacement, water main relocation, and the noted 1,600 feet of 8 inch diameter shallow sanitary sewer. Twenty one new service lateral connections were included in the scope of the construction project, which mitigated prior wet weather impacts.
