

## NORTH VERNON MUNICIPAL AIRPORT PARALLEL TAXIWAY EXTENSION

**Project:** Extend parallel taxiway to runway 5-23 to the south from the crosswind runway 15-33 to runway 5 approach end.

**Construction Cost:** \$600,000

**Funding:** AIP State Apportionment, Discretionary and Non-primary Entitlement Funds

**Summary:** The taxiway was planned to be constructed under two separate grants, one for the new taxiway and one for the rehabilitation of an existing portion. However, due to the excellent competitive bids, the airport was able to combine the work under one AIP grant and complete the work in one construction season.

**Development Date:** 2004
